Ask ZOOD in any app

In the desktop app

Speak or type a request, in any app, with a key you choose.

STEPS

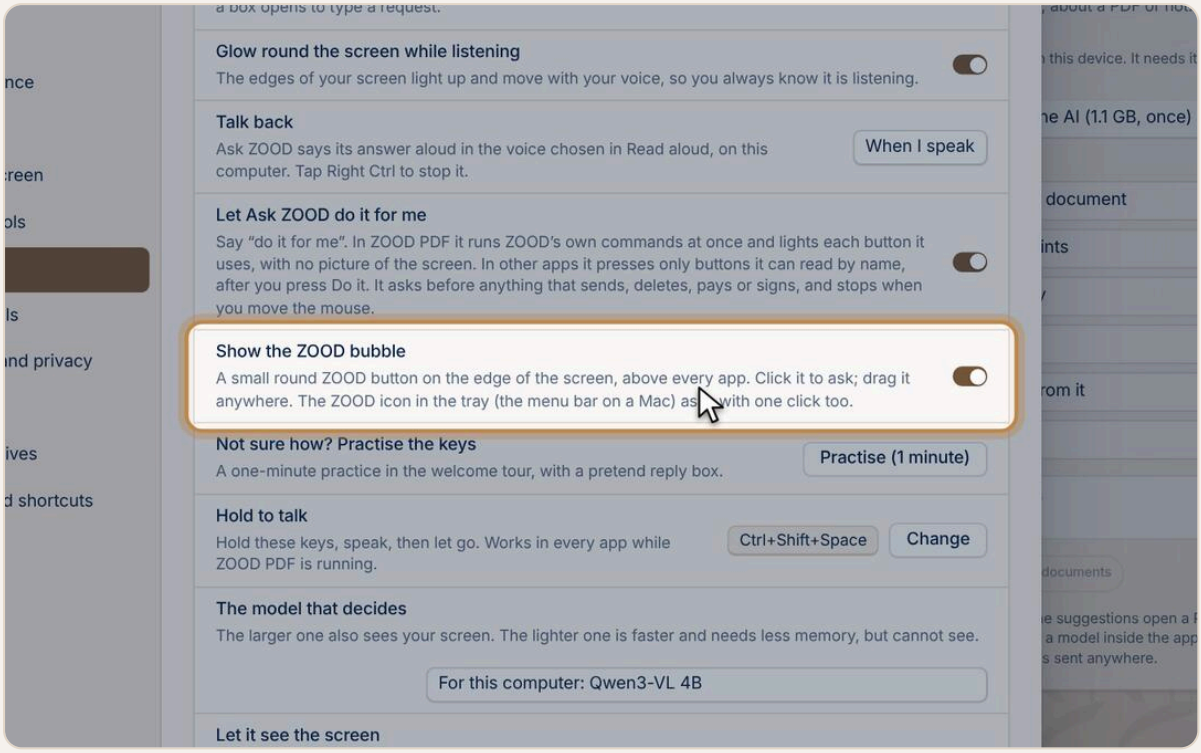

1. Tap your key once (Right Ctrl, or Right Command ⌘ on a Mac, unless you changed it) and say what you want. Tap it again or just stop talking.

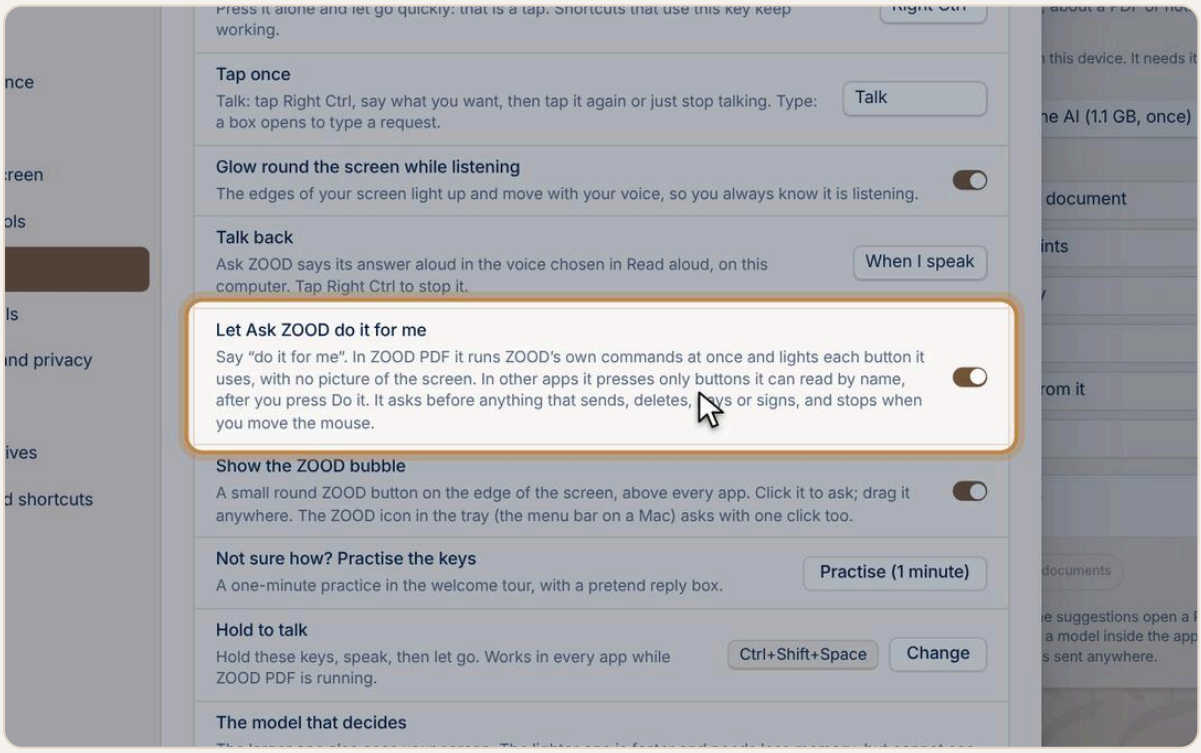

2. In a reply box in any app, tap the same key twice quickly and it writes the reply for you. It never sends it.

3. Or hold the Hold to talk keys and speak, then let go. These are different keys from your tap key.

4 Or click the ZOOD icon in the tray (the menu bar on a Mac), or the ZOOD bubble on the edge of the screen. Turn the bubble on in Settings › AI.

5 Say "do it for me": inside ZOOD PDF it runs its own commands at once and lights each button it uses; in other apps it presses buttons by their names after you agree. Turn it on or off in Settings › AI.

6 Change the keys in Settings › AI › Ask ZOOD.

TIPS

On a Mac it needs Input Monitoring, Accessibility and the microphone.

In the app: open Help › Help & Support, find this guide, then press Show me or Do it for me.
