Remove private details for good

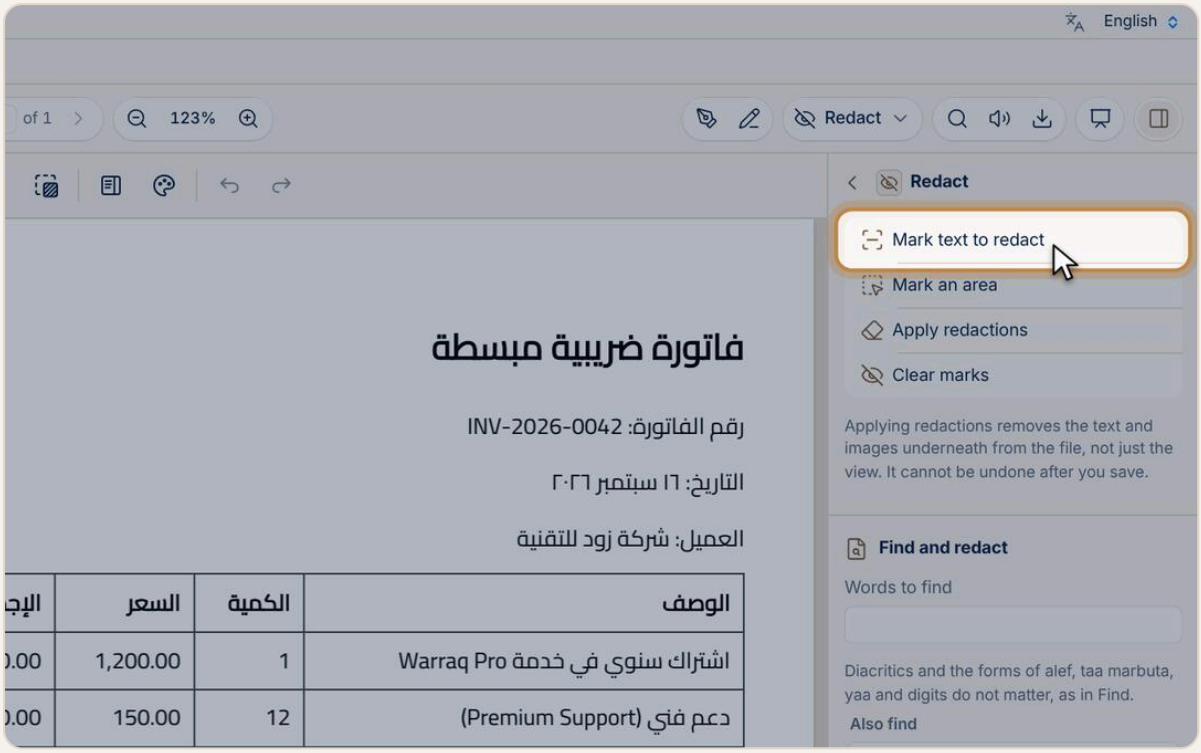

Redaction really removes the text, it does not just cover it.

STEPS

1. Open the file, then choose Redact in the tools list.

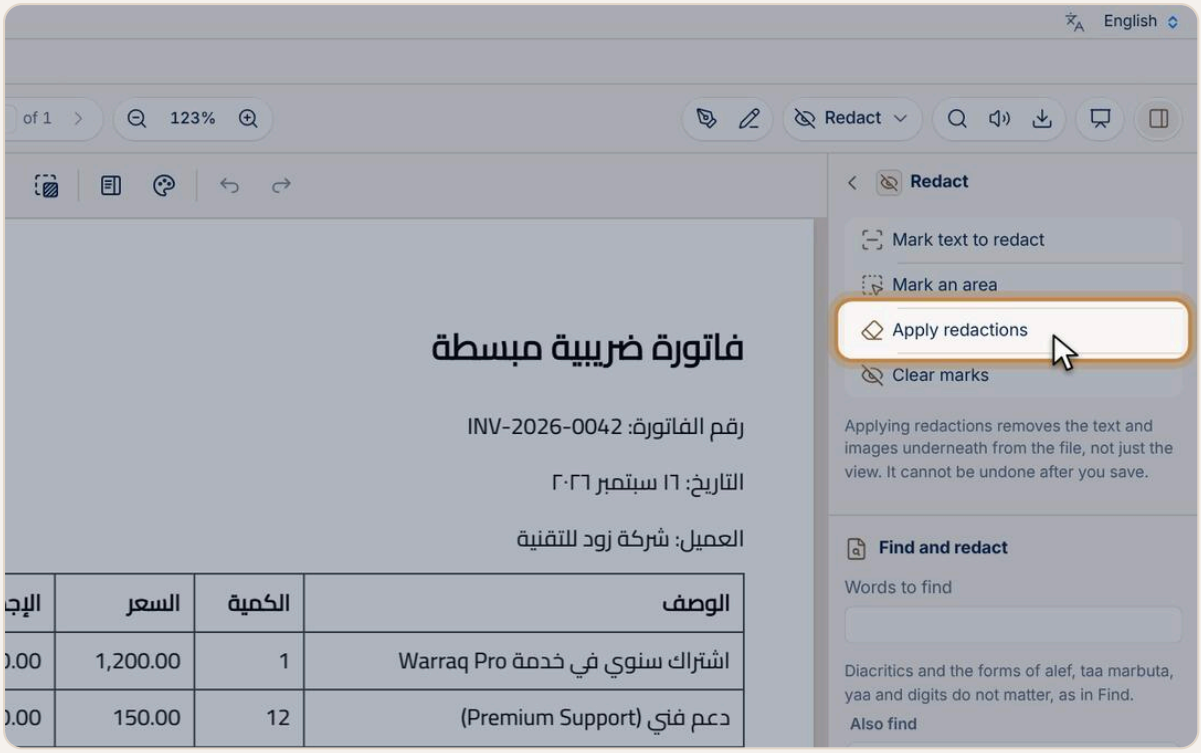

2 Press Mark text to redact and select the text, or Mark an area for part of the page.

3 Or type a word under Words to find to mark it on every page, with e-mails, numbers and IDs too if you like.

4 Press Apply redactions, then save. The text is really removed from the file.

In the app: open Help › Help & Support, find this guide, then press Show me or Do it for me.
