Ask for a presentation

In the desktop app

ZOOD writes the slides file (pptx) itself after a few questions.

STEPS

1. Say or type to Ask ZOOD: “make me a presentation about...”.
2. Fill in the topic and who it is for, then choose the number of slides (5, 8 or 12) and the look (Zood, Dark or Plain).
3. Press Make it. The AI on your computer writes the slides, then ZOOD saves the file in Documents › ZOOD PDF and opens it.
4. Every text on the slides can be edited in any slides app that opens pptx files.

TIPS

It never makes up numbers or dates: it leaves [number] or [date] for you to fill in.

Writing on the computer can take a minute or two; a bigger model writes better.
